

AKTION 2023 – ZÁVĚREČNÁ ZPRÁVA

Název projektu: **Urban Hybrid Gratz/Brno Joint Studios in Architectural Education**

Kód projektu: 97p5

The mutual experience of collaboration between two HEIs is very good, and we hope that we will develop this collaboration in the future. During the project period, we did several activities with very successful results.

Students of both HEIs worked in collaboration on the same project within the so-called "joint studio". 36 master students and 36 bachelor students took part in the joint studio. As a result of the educational process within the studio students made in total 42 projects.

During the semester bachelor students worked on the project for the design of the new intercultural centre in Graz on a vacant plot at the corner of Schönaugürtel and Schönaugasse.

Master students worked on the design for the renovation of the former Administrative building of the Municipal Committee of the Communist Party in Brno (the White House –

<https://www.bam.brno.cz/en/object/d112-administrative-building-of-the-municipal-committee-of-the-communist-party-in-brno>).

The goal of both projects was to find a suitable programme that creates the inclusion of different social groups and to implement it in an architectural design.

29 master students and 2 teachers from the Technische Universität Graz attended the mutual workshop in Brno on days 17th to 22nd of October. During the excursion students visit the White House and other architectural monuments of the city of Brno.

Within the workshop two lectures combined with a guided tour of important buildings took place. The first lecture was given by Mgr. Šárka Svobodová Ph.D. and the topic was the history and present of the building. The second lecture was about the Brno Exhibition Center and it was given by Ing. arch. Lenka Štěpánková. Ph.D.

The final presentation of students' projects took place on 10th January 2024 at the Faculty of Architecture, Brno University of Technology. On the dates 24th and 25th of January, the presentation of students' projects at TU Graz took place.

On the 8th January Sascha Hanáková, a bachelor student at the Brno University of Technology, received the Bouslav Fuchs Award, which is the award for the best student projects at the faculty.
