

**Mendel University in Brno,
Department of Animal Nutrition and
Forage Production**

invite you to a lecture

„Establishment of species-rich grasslands“

organised by the Czech-Austrian project Aktion No. 67p4

„Establishment and Management of low-input Grasslands in a Landscape for Improved Ecosystem Services“

Term: 24.10.2013 (Thursday) 3.00 – 5.00 p.m.

Venue: Mendel University, Building A, 2. floor, classroom A22

Lecturers:

Dr. Wilhelm Graiss (LFZ Raumberg-Gumpenstein)

Dr. Bernhard Krautzer (LFZ Raumberg-Gumpenstein)

Outline:

1. The situation of semi-natural grassland in Austria and the principles of species rich grassland restoration (Dr. B. Krautzer)
2. Selection and harvest of donor sites (Dr. W. Graiss)
3. Quality aspects of directly harvested seed material (Dr. B. Krautzer)
4. Seed production of semi-natural grassland species (Dr. B. Krautzer)
5. Establishment and management of semi-natural grassland (Dr. W. Graiss)
6. Practical examples from research projects (Dr. W. Graiss)

Lectures will be given in English, will be sufficient space for discussion.
